

Aetheris AI Systems · Internal Document Segment

Document ID: MANUAL-AE-2026-V4.2-PART

Confidentiality: Highly Restricted Internal

14. Asset Management

All physical and intellectual assets are tracked by the IT Department. Every hardware item is assigned a unique asset tag (e.g., `ATH-HW-1082`). Employees are personally responsible for the physical security of all assigned assets. Relocating office monitors, docking stations, or servers without submitting an IT Asset Transfer Form is a policy violation. Missing or damaged assets must be reported to the IT Helpdesk immediately.

15. Laptop Policy

Aetheris issues high-performance engineering laptops (typically Apple MacBook Pro or Lenovo ThinkPad P1 Gen 6) to all staff. Laptops are configured with full-disk encryption (FileVault or BitLocker) and must never be disabled. Laptops must remain in the employee's physical custody during travel. Leaving laptops in unattended vehicles or public spaces is strictly prohibited. If a laptop is lost or stolen, it must be reported to the IT emergency line at ext 9111 within 1 hour so the device can be remotely wiped.

16. Visitor Policy

All visitors to the Seattle Aetheris Tower must be pre-registered in the Aetheris Visitor Registry at least 24 hours prior to arrival. Visitors must check-in at the 20th floor reception, present a valid government-issued photo ID, and sign a non-disclosure agreement. They will be issued a temporary red physical badge which must be worn visibly. Visitors must be escorted by an Aetheris employee at all times and are restricted from entering the AI Research Lab (ARL) server rooms.

17. Confidentiality Agreement

Upon joining Aetheris, all employees sign the Proprietary Information and Inventions Agreement (PIIA). Under this agreement, all code, designs, algorithms, neural network weights, hyperparameters, customer details, and plans developed during employment are the sole intellectual property of Aetheris AI Systems. Sharing any proprietary information with external parties, including posting on personal GitHub accounts or discussing details in public forums, is a violation of law and subject to immediate termination and civil litigation.
