

Vanguard AutoTech Corp · Internal Document Segment

Document ID: OPER-VAT-2026-V8.0-PART

Confidentiality: Highly Restricted Internal

10. IT Security Policy

****Policy Number:**** #IT-SEC-BETA-802. IT networks at Vanguard are split into separate zones to protect industrial controls from external internet access. The corporate office Wi-Fi SSID is ****Vanguard_Plant_Secure**** (requires active security token). The Industrial Control Network is completely air-gapped and has no internet access. Remote database access for engineers is allowed via the VPN gateway: ****detroit-vpn.vanguard.com****. Document printing is routed securely; use printer ****PR-VG-PLT2-04**** (in the Shift A Breakroom) or ****PR-VG-ENG-01**** (in the Engineering Design Lab) via active keycard release.

11. Password Policy

Passwords for all accounts connected to the Vanguard network must be robust to protect industrial blueprints:

1. Passwords must be at least 14 characters in length.
2. Must include at least one uppercase letter, one lowercase letter, one digit, and one special character (e.g., #, \$, *, &).
3. Passwords must not contain sequential digits (e.g., 12345) or the name of the plant.
4. Passwords must be rotated every 60 days. System lockouts occur after 3 failed login attempts. Reactivation requires a physical visit to the IT Support Office.

12. Email Usage Policy

Vanguard email accounts (ending in `@vanguardautotech.com`) are corporate property. Sending blueprints, industrial CAD models, proprietary metallurgy formulas, or pricing sheets to personal accounts or unauthorized external domains is strictly prohibited. All outbound emails containing attachments larger than 10MB are subject to automatic security inspection and quarantine.

13. Internet Usage Policy

Internet access on the Vanguard corporate network is limited to work-related web browsing. Social media websites, video streaming services, gaming sites, and online shopping sites are blocked at the firewall level. Employees are prohibited from using personal Wi-Fi hotspots or routing corporate laptops through cellular connections to bypass company web filters.
