

Apex Healthcare & Wellness · Internal Document Segment

Document ID: CLIN-APX-2026-V1.9-PART

Confidentiality: Highly Restricted Internal

14. Asset Management

Hospital assets include MRI machines, patient monitors, ventilators, ultrasound machines, and laptops. All equipment is labeled with a barcoded asset ID (e.g., `APEX-MED-5002`). Medical devices must not be moved between complexes (Complex A and B) without updating the Clinical Asset Management system. Broken or malfunctioning medical equipment must be logged immediately via the BioMed portal (`biomed.apex.internal`).

15. Laptop Policy

Laptops are provided to medical directors, EHR administrators, and telehealth nurses. Laptops are configured with automatic clinical screen locks that activate after 2 minutes of inactivity. Laptops must never be left unattended in clinical patient wards. Employees are prohibited from storing patient data locally on laptop hard drives; all PHI must remain securely in our centralized EHR cloud database.

16. Visitor Policy

Patient visitors must check-in at Complex A reception, present photo ID, and receive a visitor badge. Standard visiting hours are from 10:00 AM to 8:00 PM CST. A maximum of two visitors per patient is allowed at any time. Visitors to ICU wards must obtain nursing supervisor clearance and wear protective gowns and masks. Visitors are strictly prohibited from accessing clinical staff areas and medication rooms.

17. Confidentiality Agreement

All employees sign the Patient Information Privacy Agreement (PIPA) upon hire. Under this agreement, all medical charts, diagnoses, procedures, and financial files are confidential patient records. Discussing patient cases in public hospital areas, posting patient information online, or accessing records of patients not under your direct clinical care is a violation of federal HIPAA law and grounds for termination and prosecution.
